

Proposal to SRM Vadapalani Incubation Center

Request for Incubation Support, Infrastructure & Strategic Partnership

Submitted by: LearnSMTH (Learn Something)

1. Executive Summary

LearnSMTH is an identity-driven experiential STEM and innovation ecosystem designed to transform students from passive learners into confident innovators, systems thinkers, and future entrepreneurs.

Our platform combines:

- Hands-on electronics and PCB-based learning
- Story-driven missions
- AI-assisted adaptive learning systems
- Entrepreneurship and startup thinking
- Psychology-driven avatars and collaborative learning frameworks

Unlike conventional tuition centres or fragmented robotics workshops, LearnSMTH integrates hardware, software, design thinking, systems thinking, and venture creation into one long-term educational journey for students from Grades 3–12.

We are seeking incubation support from SRM Vadapalani Innovation & Incubation Center to establish LearnSMTH as:

- A scalable EdTech startup,
 - A real-world educational innovation laboratory,
 - And a youth entrepreneurship ecosystem aligned with NEP 2020 and Industry 4.0 skill development.
-

2. About LearnSMTH

Core Philosophy

Curious. Creative. Confident.

LearnSMTH is built on the principle that students learn best when they:

- Build with their hands,
- Collaborate in teams,

- Solve meaningful real-world problems,
- Present and defend ideas,
- Experience identity-based learning.

Our ecosystem focuses on long-term student identity formation rather than short-term skill memorization.

3. The LearnSMTH Ecosystem

The 4-Tier Learning Architecture

Tier 1 – Spark Squad (Grades 3–6)

Students explore foundational STEM concepts using playful missions, electronics kits, beginner PCB systems, and storytelling-based learning.

Tier 2 – Tech Titans (Grades 7–8)

Students transition into systems thinking, automation, logic, sensors, and microcontroller-based engineering systems.

Tier 3 – The Innovators (Grades 9–10)

Students begin solving real-world sustainability and AI-integrated challenges using open-ended engineering and design thinking.

Tier 4 – The Industry Mentors (Grades 11–12)

Students transition from project builders into startup creators through product design, venture creation, investor pitching, and entrepreneurship frameworks.

4. The Innovation Behind LearnSMTH

The Individual Learning Quotient (ILQ™)

LearnSMTH has developed a proprietary assessment framework known as the Individual Learning Quotient (ILQ™).

Unlike traditional marks-based evaluation systems, ILQ™ measures:

- Hands-on execution,
- Systems thinking,
- Collaborative intelligence,
- Communication,

- Avatar identity synergy,
- Problem-solving resilience.

The platform combines physical classroom engagement with digital telemetry and adaptive learning analytics.

5. Why SRM Vadapalani is the Ideal Strategic Partner

SRM Vadapalani has:

- Strong engineering and management ecosystems,
- Entrepreneurial culture,
- Industry connectivity,
- Innovation-driven academic environment,
- Access to multidisciplinary student talent.

LearnSMTH aligns strongly with:

- NEP 2020 experiential learning mandates,
- Startup India objectives,
- Applied innovation frameworks,
- Youth entrepreneurship development,
- Interdisciplinary education.

We believe SRM can become the foundational launchpad for LearnSMTH's pilot, research validation, and future national expansion.

6. Proposed Areas of Collaboration

A. Incubation Support

We request formal incubation support under SRM Vadapalani Innovation Cell for:

- Startup mentoring,
- Business guidance,
- Institutional credibility,
- Strategic networking,
- Investor introductions.

B. Physical Infrastructure Support

We request access to:

- Small incubation workspace,
- Meeting room access,
- Prototype demonstration area,
- Workshop/event space for pilot demonstrations,
- Address support for official startup communication.

C. Student Talent & Internship Ecosystem

LearnSMTH can become a real-world innovation platform for SRM students across:

- Engineering,
- BBA/MBA,
- Psychology,
- Design,
- Media & Communication.

Students can participate as:

- Mission mentors,
- Community leaders,
- Product designers,
- Curriculum creators,
- Digital platform contributors,
- Franchise operators.

This creates practical entrepreneurial exposure beyond traditional internships.

7. Research & Innovation Collaboration Opportunities

LearnSMTH offers SRM the opportunity to become a living research laboratory in:

- Experiential education,

- Cognitive learning pathways,
- Gamified pedagogy,
- AI-driven adaptive learning,
- Behavioral telemetry systems,
- Child psychology & identity formation,
- Collaborative intelligence frameworks.

Potential joint outcomes:

- Research publications,
- Patent opportunities,
- Educational innovation frameworks,
- AI learning analytics models,
- EdTech commercialization pathways.

8. LearnSMTH Technology Roadmap

The LearnSMTH ecosystem integrates:

- PCB-based STEM learning kits,
- Arduino and IoT systems,
- AI-assisted adaptive learning,
- Real-time telemetry architecture,
- Parent dashboards,
- Student mission systems.

Proposed technology stack:

- React / Next.js
- Java 17 / Spring Boot
- Kafka event streaming
- MongoDB
- AI recommendation systems
- Real-time analytics dashboards

9. Market Potential & Scalability

The Indian experiential learning market is expanding rapidly due to:

- NEP 2020 implementation,
- Parent demand for future-ready skills,
- Increased STEM awareness,
- Growth in after-school learning ecosystems.

LearnSMTH's scalable model includes:

- Apartment community workshops,
- School partnerships,
- Subscription learning systems,
- DIY STEM kits,
- Train-the-trainer franchise systems,
- International NRI delivery.

10. Initial Pilot Plan

Proposed Pilot Geography

- OMR
- Velachery
- Chennai residential communities
- Partner schools

Pilot Objectives

- Validate curriculum engagement,
 - Validate mission architecture,
 - Refine PCB logistics,
 - Validate ILQ™ framework,
 - Build parent trust and community showcase models.
-

11. Long-Term Vision

LearnSMTH aims to evolve into:

- India's leading experiential STEM ecosystem,
 - A youth innovation movement,
 - A scalable EdTech platform,
 - A venture incubation pipeline for school students,
 - A global CBSE/NIOS innovation learning network.
-

12. Specific Support Requested from SRM Vadapalani

We respectfully request:

Infrastructure

- Small incubation workspace
- Access to meeting/demo rooms
- Event collaboration support

Strategic Support

- Incubation recognition
- Faculty mentorship access
- Industry introductions
- Startup ecosystem access

Talent Support

- Internship channels
- Campus recruitment support
- Student innovation collaborations

Research Collaboration

- Educational research validation
 - AI learning systems collaboration
 - Joint innovation opportunities
-

13. Conclusion

LearnSMTH is not merely a STEM workshop initiative.

It is a long-term educational innovation ecosystem designed to bridge:

- Learning and doing,
- Technology and entrepreneurship,
- Curiosity and confidence,
- Engineering and real-world impact.

With SRM Vadapalani's incubation support, LearnSMTH can become:

- A nationally scalable educational innovation platform,
- A research-backed experiential learning ecosystem,
- And a meaningful youth entrepreneurship movement originating from Chennai.

We look forward to the opportunity to collaborate with SRM Vadapalani and build a transformative educational ecosystem together.
